Biochemistry, Molecular, Cellular and Developmental Biology Graduate Program at UC Davis

BMCDB takes a collaborative, multidisciplinary approach to graduate education with world-class faculty and advanced research facilities.

 Faculty
 BMCDB boasts an energetic and diverse faculty with national and international recognition and well-funded research programs across a broad spectrum of fields.

 Funding
 Ph.D. students are financially supported through research and teaching assistantships and/or fellowships:
 • Support covers tuition, health insurance, fees and stipend
 • 2018-19 stipend is $32,557/year

 Training
 UC Davis maintains research training grant programs that provide specialized training and financial support including:
 • Animal Models of Infectious Diseases
 • Training Program in Biomolecular Technology
 • Training Program in Comparative Lung Biology and Medicine
 • Training in Molecular and Cellular Biology
 • Training Program in Vision Science
 • Pharmacology Training Program: From Bench to Bedside
 • UC Davis Chemical Biology Program (CBP)
 • CTSC Predoctoral Clinical Research Training Program
 • Year-Long Exposure to Advanced Research (YEAR) Program for Vet Students
 • NIH Initiative for Maximizing Student Diversity (IMSD)

 Areas of Emphasis
 Chromosome Dynamics and DNA Repair
 Cell Division and Meiosis
 Gene Regulation, Stem Cells and Development
 Organelles, Membranes and the Cytoskeleton
 Molecular Neurobiology
 Plant Molecular Biology
 Signal Transduction and Cancer Biology
 Structural Biology

 Research Environment and Facilities
 UC Davis is one of the largest biological research communities in the world, with a rich diversity of labs bridging the molecular, cellular, organismal and evolutionary levels of life science.

 Ph.D. students have access to specialized laboratories, research units, and advanced technology research facilities, including several clusters of excellence:
 • UC Davis Genome Center
 • West Coast Metabolomics Center
 • UC Davis Comprehensive Cancer Center
 • UC Davis Chemical Biology Program (CBP)
 • CTSC Predoctoral Clinical Research Training Program
 • Year-Long Exposure to Advanced Research (YEAR) Program for Vet Students
 • Institute for Regenerative Cures
 • Center for Neuroscience
 • Electron and Light Microscopy Imaging Facilities
